DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a ridge waveguide semiconductor laser, classified in class 372, subclass 46.
- II. Claims 12-23, drawn to a method of forming semiconductor lasers, classified in class 438, subclass 22+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, regarding claim 1 vs. claim 12, the reduced conductivity regions of claim 1 need not be made by implanting high-energy ions, but could instead be formed by oxidation or some other method. Regarding claim 1 vs. claim 19, the method of claim 19 includes passing a current through the active region to provide gain between positive and negative conductors. This is unnecessary in the device of claim 1, as optical pumping could be used to provide gain and the conductive layers would then not have to be of opposing conductivity.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Arthur Plevy on 3 December 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Menefee whose telephone number is (703) 605-4367. The examiner can normally be reached on M-F 8:30-5.
